1 Abstracts for short papers: information systems and web-based applications: engines as a form of targeted advert delivery

Melius Weideman, Timothy Haig-Smith

September 2002 Proceedings of the 2002 annual research conference of the South African

information technologists on Enablement through technology

Full text available:  [pdf \(100.23 KB\)](#)

Additional Information: full citation, abstract, references, index

The process of marketing encompasses three functions: to inform, growth of the Internet signified a dawn of a new age of marketing marketing that presented vast economies of scale. It can further provided a business advantage [Aldridge et al. 1997]. However, the advantage is not as great anymore as most medium and large size site. In the mid and late 1990's, e-commerce ...

2 Demo session: YellowPager: a tool for ontology-based mining of service direct

Prashant Choudhari, Hasan Davulcu, Abhishek Joglekar, Akshay More, Saikat Mukherjee
August 2002 Proceedings of the 25th annual international ACM SIGIR conference on Retrieval

Full text available:  [pdf\(58.14 KB\)](#)

The web has established itself as the dominant medium for doing electronic commerce. It provides significant market and business opportunities, service providers, both large and small, offer services on the web. A number of them operate their own web sites promoting their services. However, these sites are often not well integrated, and it is difficult for customers to locate the one ...

2 Balance in architectural design

Samuel Ho, Lawrence Snyder

May 1990

ACM SIGARCH Computer Architecture News

, Proceedings of the 17th annual

Computer Architecture, Volume 18 Issue 3

Full text available: [pdf\(908.23 kB\)](#)

Additional Information: full citation, abstract, references, ...

We introduce a performance metric, normalized time, which is closely related to sum of VLSI theory and the price / performance ratio of advertising literature. This metric hardware “pulling its own weight,” i.e. contributing as much to performance then prove general theorems for stating when the size of a given part is in balance

2 Delivery of electronic news: a broadband application

F. J. Burkowski, Michael A. Shepherd, C. R. Watters

October 1994 *Proceedings of the 1994 conference of the Centre for Advanced Studies*

Full text available:  [pdf\(25.31 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [ind](#)

This paper describes an ongoing research program for the development of an electronic news delivery system. The system exploits the promised high-bandwidth, switched, interactive communication facilities. The research program is in a preliminary stage and will investigate the design and organization of a client/server architecture, and user interfaces leading to a prototype model electronic news delivery system based on a newspaper metaphor, the sys ...

3 Papers from Hotnets-II: The dark side of the Web: an open proxy's view

Vivek S. Pai, Limin Wang, KyoungSoo Park, Ruoming Pang, Larry Peterson

January 2004 *ACM SIGCOMM Computer Communication Review, Volume 34 Issue 1*

Full text available:  [pdf\(102.49 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [refer](#)

With the advent of large-scale, wide-area networking testbeds, researchers can design and implement systems that interact with other resources on the Web. While such interaction can easily attract and benefit from the resources available on the Web, it can also be used to exploit and damage these resources. This paper presents a case study of such an exploit, the CoDeeN Content Distribution Network, which allows users to cache Web proxy servers to intelligently ...

4 Invited workshop on middleware interoperability of enterprise applications: A reflective middleware to solve the problem of mobile client interoperability

Paul Grace, Gordon Blair, Sam Samuel
September 2003 Proceedings of the 1st international symposium on Information and

Full text available:  pdf(180.73 KB)

Additional Information: full citation, abstract, references, citing

Mobile client applications must discover and interoperable with application services location. However, these services will be developed upon a range of middleware type and advertised using different service discovery protocols (e.g. UPnP and SLP) unk Therefore, a middleware platform supporting mobile client applications should idea interoperate with any type of discove ...

5 The attraction of personalized service for users in mobile commerce: an emr

Shuk Ying Ho, Sai Ho Kwok
December 2002

ACM SIGecom Exchanges, Volume 3 Issue 4

Full text available:  pdf(49.39 KB)

Additional Information: full citation, abstract, references, citing

There has been a notable increase in consumer use of mobile applications. Consumers applications. In response, firms have been investing billions of dollars in order to create platforms for mobile commerce. Consequently, with such large investments, firms clients and retain their old customers. In the present study, the strategic parameters determine the ways in which mobile ...

Keywords: mobile commerce, personalization, privacy

6 An architecture for secure wide-area service discovery

Todd D. Hodes, Steven E. Czerwinski, Ben Y. Zhao, Anthony D. Joseph, Randy H. Katz
March 2002 [Wireless Networks, Volume 8 Issue 2/3](#)

Full text available:  [pdf\(365.68 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [i](#)

The widespread deployment of inexpensive communications technology, computational infrastructure, and network-enabled end devices poses an interesting problem for network service or device out of hundreds of thousands of accessible services and architecture and implementation of a secure wide-area Service Discovery Service (ADS) to advertise descriptions of available ...

Keywords: location services, name lookup, network protocols, service discovery

7 GlueQoS: Middleware to Sweeten Quality-of-Service Policy Interactions

May 2004 [Proceedings of the 26th International Conference on Software Engineering](#)

Full text available:  [pdf\(652.24 KB\)](#)  [Publisher Site](#)

Additional Information

A holy grail of component-based software engineering is "write-once, reuse everywhere" distributed, component-based systems supporting emerging application areas such as web services are viewed as components and Peer-to-Peer computing, this is difficult (related to quality-of-service (QoS) issues such as security, reliability, and performance) and sometimes even at run-time, complicating the ...

- **8 Data and Content: MarconiNet supporting streaming media over localized wireless networks**
Ashutosh Dutta, Subir Das, Wai Chen, Anthony McAuley, Henning Schulzrinne, Onur Sisman, and Michael J. Freedman
Proceedings of the 2nd international workshop on Mobile communication and computing
Full text available: [pdf\(464.72 KB\)](#)
Additional Information: full citation, abstract, references, citation statistics
- Flexible multi-media streaming such as advertisement insertion, location based services, vital components that make existing Internet Radio and TV networks more attractive. Applications also provide added value to telematics, and military usage including communication awareness, distributed simulation, battlefield communication and multi-player games over a wired network can be realized ...

Keywords: join/leave latency, marconinet, multicast, streaming

- **9 Technical correspondence: Smart proxies for Jini services**
Pascal Ledru
April 2002
ACM SIGPLAN Notices, Volume 37 Issue 4
Full text available: [pdf\(280.02 KB\)](#)
Additional Information: full citation, abstract, references, citation statistics
- Jini has been advertised as a self-healing infrastructure where both services and clients go. However, it does not explicitly address the issue of how to recover when a connection suddenly fails. This paper presents how smart proxies can be implemented in order to transparently reconnect to another instance of a service in case of a failure. An language: dynamic proxy is used ...

10 Papers: A web server's view of the transport layer

Mark Allman

October 2000

ACM SIGCOMM Computer Communication Review, Volume 30 Issu

Full text available:  [pdf\(1.23 MB\)](#)

This paper presents observations of traffic to and from a particular World-Wide Web half. This paper presents a longitudinal look at various network path properties, as various protocol options and mechanisms. In particular, this paper considers how connections to transfer web data; the deployment of various TCP and HTTP option observed in the network; packe ...

11 Infomaster: an information integration system

Michael R. Genesereth, Arthur M. Keller, Oliver M. Duschka

June 1997 ACM SIGMOD Record , Proceedings of the 1997 ACM SIGMOD internationa

Volume 26 Issue 2

Full text available:  [pdf\(516.07 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citin](#)

Infomaster is an information integration system that provides integrated access to information sources on the Internet, thus giving the illusion of a centralized, homogeneous data warehouse. The core of Infomaster is a fast and efficient way to answer the user's query using as few sources as necessary and handle these sources. Infoma ...
